Kim Suñga

Senior Full Stack Web Developer
Metro Manila

Summary

I have been coding since I was 16 years old. I initially acquired proficiency in C/C++ during my first programming course in college, and later, during my second internship as a Quality Assurance Engineer in Automation at Nokia Philippines, I further expanded my skills by learning Python. Included in my programming arsenal are the following languages: PHP, JavaScript, HTML, CSS, Java, C#, and Visual Basic.

I deployed his first web application on Heroku, and during my boot camp training, I used Amazon Web Services and Microsoft Azure Cloud Services. I also know how to manage and maintain relational databases (MySQL, MariaDB, PostgreSQL, and Microsoft SQL Server) and non-relational databases (Azure Tables).

For the frontend, I know Reactjs (nextjs), a little bit of Angular, Bootstrap, and plain old HTML, CSS, and JavaScript; and for the backend, I know PHP, Python (Django, Flask), NodeJs (ExpressJS, NestJs), C# (ASP.NET Framework and ASP.NET Core), and WordPress. For testing and automation, I know how to use the Robot Framework (Python) and TestCafe (Javascript).

With more than 4 years of solid experience, I am still learning and open to new challenges.

Experience

Kooapps

Web Application Developer

May 2019 - Present (4 years 5 months)

NCR - National Capital Region, Philippines

Full stack web developer, creating production and development tools for game developers, marketing team, human resource team, etc.
